## Project Design Phase-I Solution Architecture

Date	23 October 2023
Team ID	Team-592736
Project Name	Octagon Oracle (UFC Fight Forecast)
Maximum Marks	5 Marks

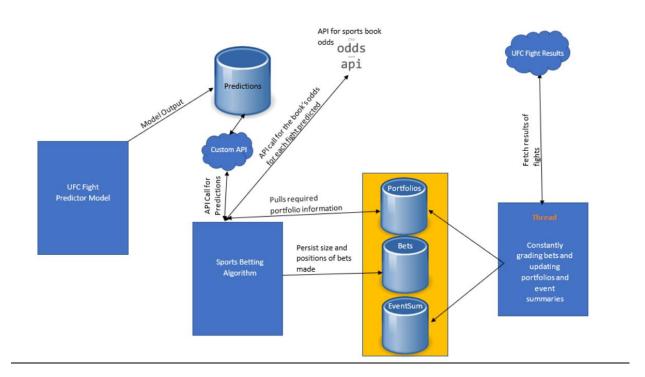

## **Solution Architecture:**

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

## Architecture

Below is the actual design of the infrastructure.

Team Members: Samarth Gakhar(21BCE0898) and Neelay Yadav(21BCE0180)
